Legend

Coords are the x,z, y (note the absurd order!) coordinates displayed above the Radar after typing "/loc". x=e/w y=n/s z=altitude
Req.: prerequisites: Y = other logos to open portal; #x = prior quests, Lx = minimum Level before the NPC will offer the Mission;
Diff: Difficulty rating based loosely on the zone starting level: (S)olo, (G)roup, (+) Hard; (++) very hard (so, S++ = G)
<i>Coordinates in blue Italics</i> indicate an entry point (eg: cave mouth) rather than the exact location of the logos
<i>Grey Italics</i> indicates a logo that we have heard from an official or unofficial source, but not yet confirmed

Notes

WARNING: /loc coordinates DO NOT MATCH the [M]ap coordinates in several zones. Type: /loc and use these coords (above minimap)
Some logos elements on the NCsoft web site [Logos Dictionary] have been implemented with a different name eg: battle => war
Logos elements can be discovered and collected without the quest (if there is one) and the quest may still be offered afterward
please send corrections/updates to: content@giddygamer.com subject: tr logos
